

Hangable and Stackable Plastic Bin Boxes

A lip on the back allows bin boxes to hang from rails or louvered panels. (See page 1580 for rail bin-box holders and louvered panels.) All are made of FDA-compliant polypropylene, unless noted. *Optional dividers* fit front-to-back and are black. *Optional windows* fit on the front of the bin box and are clear.

To Order: For bin boxes, please specify color: blue, red, translucent, or yellow, unless noted.

Heavy Duty Plastic Bin Boxes

(A) **Structural foam polystyrene stackable bin boxes** have strong, thick walls; a raised tab on the back that catches the underside of a shelf when tilted; and a molded-in label holder. Color is blue. *Optional dividers* can intersect to form compartments. Color is gray.

(B) **Fiberglass nestable and stackable bin boxes** provide high-strength storage and offer excellent chemical, solvent, and oil resistance. **To Order:** Please specify color: gray, green, or red.

Extra-Wide Divided Plastic Bin Boxes

You'll get six compartments in one with these divided bin boxes. All are nestable and stackable. Made of polypropylene. **To Order:** Please specify color: blue, red, or yellow.

Optional dividers fit side-to-side and are black.

Top Outside Size, Wd. x Dp. x Ht.	Inside Compartment Size, Wd. x Dp.	Cap., lbs.	Each

Static-Control Plastic Bin Boxes

Keep your components safe from static with these bin boxes. The antistatic bin boxes drain charges more slowly than the conductive bin boxes, which are used when static electricity needs to be drained more quickly.

Antistatic hangable and stackable bin boxes come with a lip on the back so you can hang them from a rail or louvered panel. (See page 1581 for static-control panels and racks.) All have a label holder and are made of polypropylene. Surface resistivity is 10⁹ to 10¹² ohms/sq. Color is blue. **Also Available:** Labels for bin boxes. Please ask for 1515T322.

Conductive hangable and stackable bin boxes have a lip on the back so you can hang them from a rail or louvered panel. (See page 1581 for static-control panels and racks.) Surface resistivity is 10⁵ ohms/sq. Color is black. *Optional dividers* fit front-to-back and are black.

Conductive stackable bin boxes have molded-in label holders and a bar in front for stability. Surface resistivity is 10³ ohms/sq. Color is black. **Also Available:** Labels for bin boxes. Please ask for 4761T1.
