

The Emanation

In the **The Emanation - Overlapping Circles** I've mentioned about the idea that the entire universe already exists and we give it a meaning, we attach definitions so we can understand and explore and experience... but I did not mentioned about a specific symbol which emerges from the blueprint of all blueprints.

In this material I will focus more on the popular symbol, the great seal found on the One dollar bill. Not from a conspiracy theorist point of view but from a much deeper perspective so you can form your own conclusions if you will.

In this material I will show you how a symbol can have many interpretations based on the purpose it needs to serve...therefore, we can conclude that all truths are true by definition.

Who is defining the truth? We all do, for ourselves, there is not only one truth but all.

Same goes for lies and deceivings too.

By all means I don't do conspiracy and I don't promote, focus or negate or invalidate the negative aspects of human experience but know that all has a purpose, you have the power to give it a positive meaning or a less positive meaning which, reflects in the reality you decide to create and experience.

That being said, The Emanation, what is it?

Simple answer? It is a very powerful symbol which is representative to creation, development, emerging, birth... the essence of creation.

The symbol consists in a triangle pointing up, which is representative to direction, flow, masculine energy, stable base, "strong foundation".

In the center of this energy symbol is the vesica piscis, or "the womb" -- as ancient scholars name it tho it is not named accurate because the anatomic shape of the womb is in fact a triangle pointing down (within the pear shape uterus), but yes, they might of being a little more pudic, bashful and instead of *vulva* refer to it as *womb* -- which forms from overlapping two circles, two energies.

In the center of the womb which is representative for/to feminine energy is a new circle, the *Orphic Egg* (cosmic egg), which can be representative to the fractalization of the first creation, cyclicity, life (overlapping circles, one more circle, one more emanation).

To wrap this up and connect the dots, the triangle which is the masculine energy holds the space for feminine energy in order to create new energy, a new cycle.

How this symbol looks like?

Well, as I've mentioned, it is a powerful source of energy, not only emanates energy but it is actually creating it and some scholars figure that out long ago.

Some symbols are storing energy, some direct it, some transform it, some symbols interact with energy in various ways and there are a few symbols which are basically creating energy. **The Emanation** is such a symbol but you might know it under a different name and associated with a different purpose, I am referring to the **Eye of Providence**.

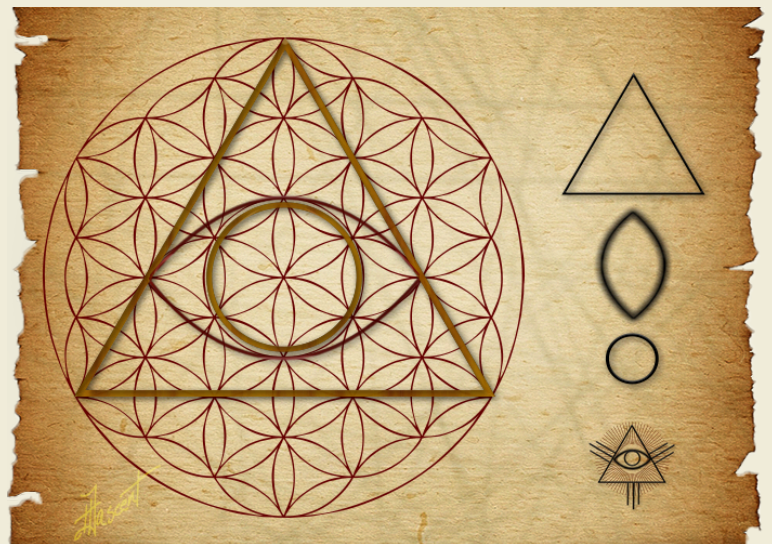

The version defined by many is the version you might be familiar with:

The Eye of Providence or All-Seeing Eye is a symbol depicting an eye, often enclosed in a triangle and surrounded by rays of light or a halo, intended to represent Providence, as the eye watches over the workers of mankind. ~ Wikipedia

Yes, one of the great seals from the One dollar bill is the **Eye of Providence** with a powerful meaning yet it is a man's "translation" of the powerful energy of **The Emanation**.

The great seal - One Dollar bill

First Emanation - Flower of Life

Eye of Providence carries multiple meanings, one for the mundane, for the common people, the definitions from the Wikipedia, other similar sources and the *seal of first creation** the core, original meaning as **The Emanation**, the source of known creation.

That can be one reason why we can still see the rays, emanating from the Eye, it is a more acceptable interpretation rather associating it with the feminine energy, vulva, the womb...which doesn't align within a patriarchal society.

Circling back to the great seal from the One Dollar bill, one can notice that **The Emanation** or the **Eye of Providence** is represented as a 2d object while the pyramid is represented as a 3d. The Emanation is giving birth to the cycles, life, experience and masons are building the structure.

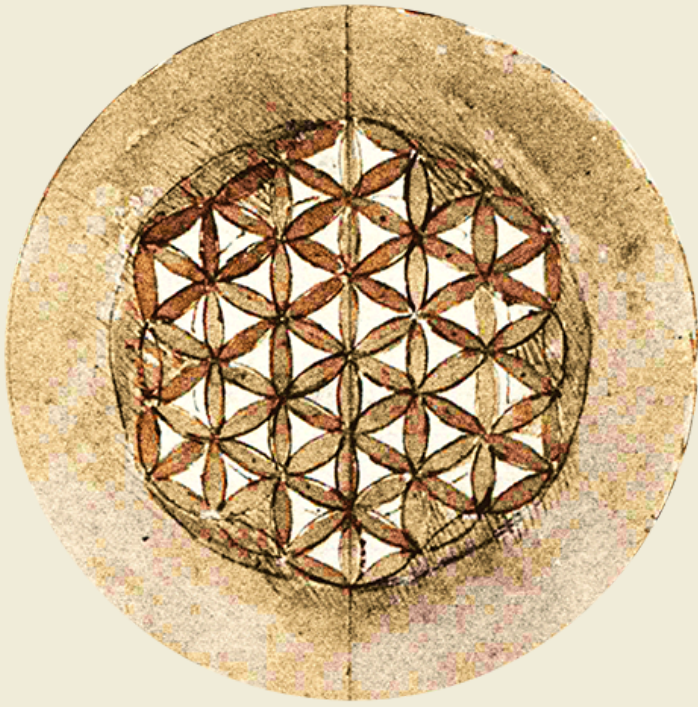

A mason is a skilled worker which builds using stone, **bricks**, cement or mortar (strong foundations) and in a sense some organizations appropriate some of the concepts and ideas and scaled them up to other levels of use, from here we have the associations with **Freemasonry** and **Illuminati**, the elite groups and organizations people still empower them and talk about.

Let me disclose a well kept secret, we are all illuminati because we all think, we all poses our own level of knowledge which is different (in so many cases) from others.

If anyone's desire is to be part of the elite, simply enlighten yourselves, lighten up, detach from obsolete knowledge and believes that no longer serve the individual or the collective, unburden from old, give up knowing to understand knowledge.

There are so many fear based beliefs and so many negative noise surrounding the expressions like "elite", "illuminati" which should of be representative to a positive aspects, so here's magic I share with all, take that power back, redefine what "elite" really means, what to be enlightened, illuminated really means.

Be the creator of your own reality by redefining or resetting to the true meaning seal of first creation.

Facts exist, fundamental truths must exist also and because **Truth** can not be deliberately denied all the way it is one of the divine rules, it is simpler, more efficient to twist it, to blur it, to add or subtract from its message and promote a less powerful version of the real powerful Truth.

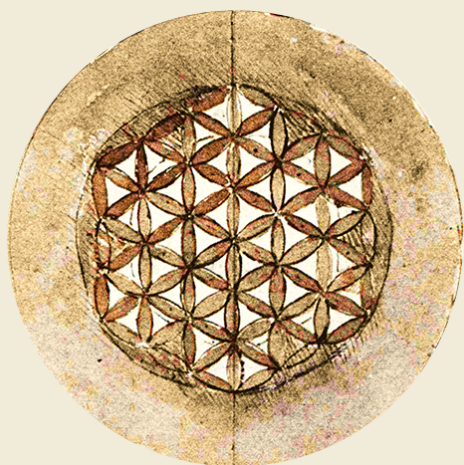

From the same perspective we can look at various magic practices too, sometimes deliberately diluted, but not to remove them from life experience but to deny real access and power of manifestation to the common people.

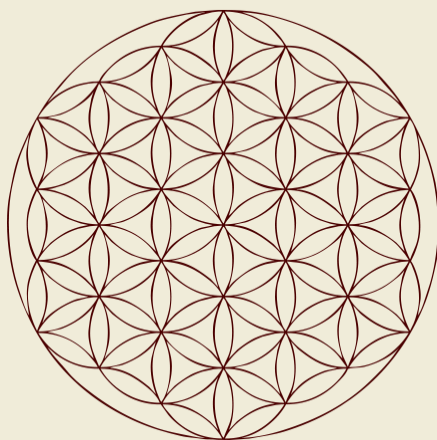

Masonic insignia - Symbols

The freemasons did kept the idea of the cosmic egg, the circle (the iris of the eye) which emanates from the womb (the eye) as seen in some seals or insignia, because the energy, the meaning, the power is there, in the magic point where sacred geometry meats physicality (the material) and the spirit.
